

EZGİ DEMİR

FULL STACK DEVELOPER

PROFILE SUMMARY

I have around 2 years of experience in full-stack development. I have basic knowledge of C and Python, and I have a solid grasp of algorithmic thinking. I developed projects using JavaScript, HTML, and CSS, and progressed in frameworks such as React, Vue, Next.js, and Nuxt.js. I did backend development with PHP and Laravel, and I used MySQL for database management. I developed mobile applications using Java, Kotlin, Dart, and Flutter.

I created responsive front-end designs with a strong focus on UI/UX principles. I integrated the designs I received from Figma into the applications by coding them precisely.

EDUCATION

NEAR EAST UNIVERSITY, CYPRUS
2020 - 2024

- Bachelor of Science in Computer Engineering
- Official diploma verification link to be provided upon request.

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Effective Communication
- Discord, Zoom, Slack, GitLab & Development Cycle
- Code Review Checklist
- Agile Meetings
- Site on, Hibrit, Remote Experience

LANGUAGES

- Türkçe: Fluent
- English: Upper-Intermediate

REFERENCES

References available upon request.

WORK EXPERIENCE

Webomax, istanbul Full Stack Development Intern

- I learned and practiced backend development using PHP and Laravel.
- I gained hands-on experience with MySQL for managing and structuring databases.
- I used Git for version control and became familiar with collaborative workflows.
- I worked with Figma files and implemented UI/UX designs into real projects.
- I experienced both remote and hybrid work environments.
- I collaborated closely with team members throughout the development process.
- I contributed to UI/UX design processes and applied them effectively in frontend development.

APRIL 2023 - AUGUST 2023

Furthersoft, Nicosia Backend Development Intern

- I learned and used Vue.js and core JavaScript to build interactive user interfaces.
- I worked on project-based tasks that simulated real-world development scenarios.
- I integrated APIs and handled asynchronous data in frontend applications.
- I was mostly involved in backend development and improved my understanding of backend logic.
- I gained hands-on experience in full-stack development workflows.

March 2024 - May 2024

Euperline, istanbul Frontend Development Intern

- I worked on improving UI/UX design to enhance user experience and accessibility.
- I edited and customized PHP files within WordPress themes to meet project needs.
- I optimized websites by implementing SEO best practices, including proper use of meta tags and page structure.
- I contributed to increasing overall website quality and performance through design and code improvements.

June 2024 - August 2024

Cyprus International University, Nicosia Full Stack Developer

- I developed and maintained full-stack web applications using PHP (Laravel) and MySQL.
- I built cross-platform mobile apps using Java, Kotlin (Android), Flutter, and Dart.
- I designed and implemented responsive, user-friendly interfaces based on modern UI/UX principles.
- I created dynamic front-end features with JavaScript and integrated various RESTful APIs.
- I used GitLab for version control, applying structured workflows with merge requests and branching strategies.
- I followed internal code quality rules (like GLR and RC) to write clean, maintainable, and consistent code.
- I worked in Agile teams, participated in daily stand-up meetings in English, and regularly discussed tasks and progress.
- I collaborated with team members on shared projects and contributed to team success through communication and coordination.

January 2025 - Current
